DENIS PUSZKIEWICZ: I don't have much to say

552306

7 but I came to Nevada 35 years ago and traveled the world
8 and loved this place, and I don't want the dump here, but
9 I would like to know one thing, and I have talked to some
10 of the citizens to learn about it.

11 Technology exists to use this fuel and this
12 bomb-grade waste to make more power, and I just want to
13 get it on the record, you know, why the government has
14 not looked into this. Especially what I'm talking about
15 is Argonne National Lab, and it's called a Generation 4
16 reader reactor that takes this fuel and turns it into
17 waste that you can go and hold in your hand.

18 Now, I know you guys want -- I don't
19 understand why you guys want to put this down here in
20 Nevada. Is it money, is it greed or is it somebody's own
21 agenda? I would just like to know why you guys have not
22 looked at this.

23 President Clinton back in '94 cut the funding
24 to this, and then Congress also passed the resolution
25 where you could not use spent fuel or weapons-grade waste

141

1 to use power, use it for power, so I'd just like to know
2 on the record why you guys have not looked at this and
3 this has not been addressed. That's all I have to say.
